SUMMARY

Frontend engineer with close to three years building React and Next.js apps in TypeScript for production. I was the only frontend developer on an invitation-based travel platform, so I owned everything the user touched, from the booking flows for flights, hotels, and trains through the GDS and REST integrations, auth, and performance work on heavy search screens. I care about reusable components, clean data flows with React Query, and tests that catch problems before they reach users. When a feature needs it, I'll drop into the Node/Express and PostgreSQL layer to finish it end to end.

TECHNICAL SKILLS

Core Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Material UI, Framer Motion, Custom Hooks, Responsive Design, Component-Based Development, Accessibility (WCAG)

State & Data: React Query, Context API, REST APIs, Axios, Postman

Testing: Jest, React Testing Library, Unit & Component Testing

Performance: Lazy Loading, Code Splitting, Memoization, Lighthouse Optimization

Authentication: JWT, Protected Routes, Token Handling

Backend (working knowledge): Node.js, Express.js, REST APIs, PostgreSQL, Prisma ORM

Tools: Vite, Git, GitHub, Jira, Figma, VS Code, Agile, Scrum, AI-Assisted Development (GitHub Copilot, Claude, ChatGPT)

EXPERIENCE

Frontend Software Engineer | Enspirit Technologies, Hyderabad

Sep 2023 – Aug 2026

Sole frontend developer on an invitation-based event travel platform (team of 9 to 11), where hosts create events and invited guests book flights, hotels, and trains. Owned every customer-facing screen.

- Built the full booking flow across all three verticals (search, filtered results, passenger and guest forms, fare rules, and checkout) as a reusable, component-driven UI.
- Integrated third-party travel and GDS REST APIs for search and booking, handling caching, background refetching, and shared state with React Query, Axios, Context API, and custom hooks that wrapped the reusable data-fetching logic.
- Wrote the entire frontend auth flow: login, protected routes, token handling, and session management.
- Added Jest and React Testing Library coverage around the booking and auth flows, which cut regressions on the screens that changed most often.
- Took the Lighthouse score on the heaviest search and checkout screens from 64 to 89 with lazy loading, code splitting, and memoization on a Vite build; flight search-results rendering got 20 to 25% faster.
- Built responsive, WCAG-accessible interfaces with Tailwind CSS and Material UI, and owned features from sprint planning through release.
- Reviewed two junior developers' code for about a year and a half, mostly around component structure and performance.

SELECTED PROJECTS

Splitzy, Expense Splitter | Next.js, TypeScript, Node.js, Express, PostgreSQL, Prisma, React Query [\[Live\]](#) [\[GitHub\]](#)

- Full-stack expense splitter with a normalized PostgreSQL schema in Prisma, a REST API using JWT auth and bcrypt hashing, and a React Query frontend with persisted dark/light theming.
- Wrote a settlement algorithm (greedy debtor-creditor matching) to keep the number of transactions down, and wrapped expense writes in DB transactions so balances never drift.

Product Explorer | Next.js, TypeScript, Node.js, Express, React Query [\[Live\]](#) [\[GitHub\]](#)

- Performance-focused product catalog with server-side pagination, combinable category and price filters, and debounced search, backed by a Node/Express API with query validation.
- Pushed Lighthouse Performance from 63 to 89 with next/image, lazy loading, code splitting, and memoization; added skeleton loaders and accessible dark/light themes.

Portfolio Builder | Next.js, TypeScript, Node.js, Express, PostgreSQL, Prisma, React Query [\[Live\]](#) [\[GitHub\]](#)

- Full-stack resume builder with user accounts, JWT auth, and per-user ownership. Four templates share one data model, with drag-to-reorder, live preview, autosave, and PDF export.

EDUCATION

B.E., Electrical and Electronics Engineering

Aug 2019 – May 2023

Vidya Jyothi Institute of Technology, Hyderabad • CGPA: 8.0/10
