SUMMARY

Frontend engineer with nearly 3 years of experience building production React and Next.js apps in TypeScript. I was the only frontend developer on an invitation-based travel platform, where I owned everything the user touches, from multi-vertical booking flows for flights, hotels, and trains to GDS and REST API integration, auth, and the performance work that keeps heavy search screens fast. I like building reusable components, taming messy data flows with React Query, and writing tests that catch regressions before they ship. I'm comfortable dropping into the Node/Express and PostgreSQL side when a feature needs it.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3

Frontend: React.js, Next.js, Tailwind CSS, Material UI, Framer Motion, Responsive Design, Component-Based Development, Accessibility (WCAG)

State & Data: React Query, Context API, REST APIs, Axios, Postman

Testing: Jest, React Testing Library, Unit & Component Testing

Performance: Lazy Loading, Code Splitting, Memoization, Lighthouse Optimization

Authentication: JWT, Protected Routes, Token Handling

Backend & DB: Node.js, Express.js, REST APIs, PostgreSQL, Prisma ORM

AI: Prompt Engineering, AI Application Development, AI-Assisted Development (GitHub Copilot, Claude, ChatGPT)

Tools: Git, GitHub, Jira, Figma, VS Code, Agile, Scrum

EXPERIENCE

Frontend Software Engineer

Enspirat Technologies, Hyderabad, Telangana

Sep 2023 - Aug 2026

- Only frontend developer on an invitation-based event travel platform (team of 9 to 11) where hosts create events and invited guests book flights, hotels, and trains. Owned every customer-facing screen.
- Built the full booking flow across all three verticals (search, filtered results, passenger and guest forms, fare rules, and checkout) as a reusable, component-driven UI.
- Integrated third-party travel and GDS REST APIs for search and booking; handled caching, background refetching, and shared state with React Query, Axios, and Context API.
- Wrote the entire frontend auth flow: login, protected routes, token handling, and session management.
- Added Jest and React Testing Library coverage around the booking and auth flows, cutting regressions on the screens that changed most.
- Took the Lighthouse score on the heaviest search and checkout screens from 64 to 89 with lazy loading, code splitting, and memoization; flight search-results rendering got 20 to 25% faster.
- Built responsive, WCAG-accessible interfaces with Tailwind CSS and Material UI, and owned features from sprint planning through release.
- Reviewed two junior developers' code for about a year and a half, mostly on component structure and performance.

SELECTED PROJECTS

Expense Splitter | Next.js, TypeScript, Node.js, Express, PostgreSQL, Prisma, React Query | [Live](#) · [Code](#)

- Built a full-stack expense splitter end to end, with a normalized PostgreSQL schema in Prisma, a REST API using JWT auth and bcrypt hashing, and a React Query frontend with persisted dark/light theming.
- Wrote a settlement algorithm (greedy debtor-creditor matching) to minimize the number of transactions, and wrapped expense writes in DB transactions so balances never drift.

Product Explorer | Next.js, TypeScript, Node.js, Express, React Query | [Live](#) · [Code](#)

- Performance-focused product catalog with server-side pagination, combinable category and price filters, and debounced search, backed by a Node/Express API with query validation.
- Pushed Lighthouse Performance from 63 to 89 with next/image, lazy loading, code splitting, and memoization; added skeleton loaders and accessible dark/light themes.

Portfolio Builder | Next.js, TypeScript, Node.js, Express, PostgreSQL, Prisma, React Query | [Live](#) · [Code](#)

- Built a full-stack resume builder with user accounts, JWT auth, and per-user ownership. Includes four templates from one shared data model, drag-to-reorder, live preview, autosave, and PDF export.

EDUCATION

B.E., Electrical and Electronics Engineering

Vidya Jyothi Institute of Technology, Hyderabad

Aug 2019 - May 2023 | CGPA: 8.0/10
